***Allowable Subject Matter***

1. Claims 1-10 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or suggest a routing loop detection method that reads destination IP addresses of discarded packets from the time-exceeded messages of the packets extracted by an extracting portion; transmits an investigating pack to the destination IP address read by the reading portion through a communication device; receives a packet in response to the investigating packet transmitted by the transmitting portion through the communication device; and an output portion that notifies occurrence of routing loop when the packet received by the receiving portion has a time-exceeded message or a counter that counts the number of packets whose IP header includes a hop number for each of all possible hop numbers when a packet capture device connected to a network acquires all packets captured within a predetermined period; a discriminator that discriminates whether a flat portion or a sawtooth portion exists in a histogram based on the number of packets for the respective hop numbers counted by said counter; and an output portion that notifies a sign of occurrence of routing loop when the discriminator discriminated that the histogram has the fiat portion or the sawtooth portion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
